V125 SPECIAL FEATURES

FLEX FENDER

With the introduction of the 175 TV in 1957 Innocenti introduced the flex fender that became the iconic character of all future Lambrettas

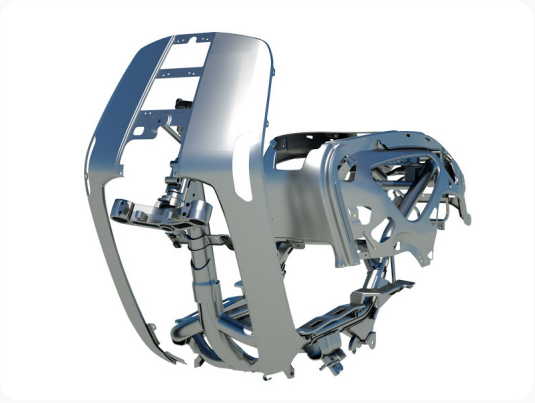

SMALL DETAILS

Every detail of the V-Special is proof that it is a pure Lambretta: Head and rear lights show the Lambretta trademark while the key is decorated with the traditional Lambretta lion. A large luggage area can be found under the comfortable seat. In regards to technology, the new V-Special is up-to-date. Front and rear disc brakes with Bosch CBS provide excellent braking performance

DOUBLE LAYER SEMI MONOCOQUE

Lambretta introduces with the V Special the double layer side panel. Constructed with exceptional steel materials, its semi-monocoque structure features a central steel beam ensuring rigidity and resilience. This is bolstered by 1.2 millimeters steel plate frame, reinforcing the body comprehensively. The semi-monocoque construction is a nod to Lambretta's rich history of innovation, ensuring that riders enjoy a scooter that's built to last and designed to impress.architecture This construction not only enables Lambretta owners to reach their engine easily, but also avoids unnecessary added weight .

FULL LED LIGHTING SYSTEM

The Lambretta Model V brings the past into the present with its full LED lighting system, elegantly incorporating the iconic Lambretta logo within both the headlight and rear light. This design choice is more than a nod to heritage; it's a beacon of tradition, illuminating the path ahead while casting a warm glow on the memories of yesteryear. Inspired by the legendary SX series, the shapes of the lamps blend timeless appeal with modern functionality, offering a lighting experience that is as practical as it is poignant.

DUAL ANALOGUE AND DIGITAL DISPLAY

Combining classic and modern design on a semi-digital meter that combines Analogue and LCD (Liquid Crystal Display) are seamlessly integrated. With an analogue display that brings a nostalgic touch, riders can glance at the sweeping hands that track their journey in a dance of tradition. Complementing this is the Liquid Crystal Display, which offers at-a-glance information with the precision that only modern digital technology can provide. Together, they create a dashboard that is not just informative but also an exquisite element of the scooter's design.

BOSCH CBS DISC BRAKE SYSTEM

Experience unmatched confidence on the road with the advanced Bosch CBS (Combined Brake System) featured in our 220mm disc brakes, both front and rear. This system is meticulously engineered to distribute braking force evenly, ensuring a smoother, safer stop no matter the road conditions. With the Lambretta approved CBS technology, you're empowered with superior control, allowing for a composed and confident ride every time you set out on your Lambretta scooter.

FRONT GRILLE

Modern Lambrettas pay homage to their iconic past with a front grille that mirrors the classic design of the revered Li Series. Originally conceived as a functional outlet for the horn’s sound, this distinctive grill has transcended its utilitarian roots to become a signature feature, a piece of Lambretta’s soul, echoed across time.

MULTI SPOKE ALLOY WHEELS

Lambretta’s 12" alloy wheels are a perfect harmony of form and function, designed to take on any road with confidence and style. Forged from strong, durable materials, these rims aren’t just built to last; they’re crafted to complement the scooter’s beauty. Their robust construction ensures they can handle the rigors of the journey, whatever the distance or destination. These wheels do more than move you; they inspire the way forward with steadfast reliability and striking appeal.

EXHAUST

Lambretta’s exhaust system is a testament to the seamless integration of sharp design and advanced functionality. The exhaust pipe, reinforced with meticulously crafted heat shields, not only complements the scooter’s sleek contours but also stands as a symbol of Lambretta’s dedication to safety and style. The Lambretta exhaust system proudly meets the stringent EURO 5+ emission standards, reflecting Lambretta’s commitment to environmental responsibility without compromising on performance. Riders can relish in the knowledge that their scooter’s emissions are clean, making for a ride that’s as respectful to the planet as it is enjoyable.

GLOVEBOX WITH USB CHARGER

The V125 marries classic design with modern convenience, featuring a USB charger discreetly nestled within the glove box. This thoughtful addition ensures your digital devices are always powered, allowing you to stay connected, no matter where your journey takes you. It’s about enhancing your ride with the conveniences you need, hidden right where you need them.
